Budget Message for the City of Brookings

Fiscal Year 2025-26

To: Citizens of the City of Brookings
Honorable Mayor Isaac Hodges
Members of the City Council
Members of the Budget Committee

Date: June 9, 2025

On behalf of the staff of the City of Brookings, I am pleased to present the adopted budget for Fiscal Year (FY) 2025-26. As required by law, the budget, in the amount of \$71,548,987, is balanced and provides for the basic needs of the City.

Budget Process

The budget process began in February with each department preparing their own proposed budget. This information, along with past historical trend data and a projection of future revenues and expenditures, is used to prepare the proposed budget.

The Department Directors, Finance Director/Budget Officer and City Manager met several times to determine the City departmental needs and goals for the upcoming 2025-26 City of Brookings fiscal year. In addition, the Budget Committee held two workshops in March and April. We focused on maintaining current levels of service, identifying deferred maintenance issues and projects, reviewing potential utility rates, evaluating City personnel needs and analyzing the financial position of the City. This budget addresses these issues by recommending certain projects and positions to be funded in FY 2025-26.

The proposed budget is then presented to the Budget Committee (Mayor, City Council and five lay citizens). The Budget Committee meets to publicly discuss the document and approve the proposed budget and any recommended changes. Public comment is received on the City's Budget and the Budget for State Revenue Sharing funds.

A summary of the approved budget is then published in a local newspaper for public information and review. Prior to June 30, the City Council holds a public hearing to receive public input on the programs and services funded in the budget as approved by the Budget Committee. Since the City operates on a fiscal year beginning July 1st and ending June 30th, the budget must be adopted by the City Council by June 30th of each year.

Accounting Basis

The City of Brookings uses the modified accrual basis of accounting, which means that revenues are recognized in the period they become available, and expenditures are recognized in the period in which the liability is incurred. This basis of accounting is consistent with prior years and in compliance with Generally Accepted Accounting Principles. The City uses a collection of separate funds to capture budgeted and actual revenues and expenditures. Each fund is designed to separate transactions in compliance with specific programs or to aid in the management of public dollars received.

The 2025-26 budget includes revenues and expenditures for twenty-four (24) funds. Money cannot be moved between funds without the proper budgetary appropriations. Each fund is a separate accounting entity with a self-balancing set of accounts. The budget provides for funding of a wide range of public services for the citizens of the City of Brookings; police and fire protection, street and park maintenance, water and sewer utilities, building inspection, land use planning, economic development and financial and administrative services.

Budget Strategy

A basic philosophy in the development of the budget is to conservatively estimate revenues while including all identifiable and measurable expenditures anticipated for funding a goal, program or service. It continues to be a challenge to fund all necessary and desired programs to meet the needs of the citizens of the City of Brookings with limited resources. All of the Department Directors and their staff understand our budget constraints and are always looking to identify cost saving ideas or grant fund opportunities.

Relationship to Goals and Objectives

In developing the budget, management has been mindful of the City Council goals and objectives adopted in the Strategic Plan. Key goals and objectives underlying the development of this budget include:

- Achieving fiscal sustainability by maintaining a General Fund reserve of at least 5 percent of the annual operating budget.
- Completing capital projects, and continuing a program to replace or rehabilitate aging infrastructure.
- Improving the use of technology, including continuing to maintain the website that will both inform and enable citizens to conduct business with the City more effectively.

These and other goals and objectives are addressed in the budget.

Budget Document

The budget package includes a budget message describing the key highlights of the budget, and a description of the type of expenditures typically included in each expense account. To facilitate the financial review, budget worksheets are included which show year-to-date numbers along with historical data.

Total outstanding and authorized, not incurred, infrastructure debt in all funds on July 1, 2025 is anticipated to be \$30,074,027.

Governmental Loan Fund	\$ 475,504
Water Loan 2014	\$ 645,755
Business Oregon SDWRLF - Water	\$ 3,956,768
USDA – RD Wastewater	\$ 24,996,000

Budget Trends

Property Taxes are collected on assessed values. Following is a breakdown of those values:

Fiscal Year:		
	2022-23	\$869,978,664
	2023-24	\$910,895,854
	2024-25	\$947,847,291
<i>Estimated</i>	2025-26	\$976,282,710

General Fund

Property tax revenues are relatively flat. The City tax rate is fixed at \$3.763/\$1,000 of assessed valuation and is not increased from year to year. Measure 50, approved by the voters, limits increases in assessed values to three-percent, up to the market value. There has been an increase in the revenue received from the Transient Room Tax over the last couple of years, which had remained flat for several years. Other revenues such as grants and other miscellaneous revenues may fluctuate from year to year. Transfers from other funds to the

General Fund represent those funds paying their share of administrative expenses.

Carryover from the prior year is used to cover expenditures until tax revenue begins coming in November. For the most part, carryover is generated from contingencies, by spending less than budgeted, expending as budgeted or sometimes due to receiving more revenue than projected. Our projected General Fund beginning balance (carryover) for this budget is \$1,600,000, with an expected unappropriated ending fund balance at June 30, 2026 of \$689,409.

Personnel costs are charged directly to the appropriate fund. General fund administrative expenses (exclusive of personnel costs) are charged to the appropriate fund through a transfer. The budget reflects a franchise fee for water and wastewater which is transferred into the General Fund.

Several years ago the Council and Budget Committee began building a General Fund contingency to provide for a guaranteed carryover each year and to cover unplanned expenses. The goal is to have a contingency of at least 5% of the General Fund budget expenditures. This is difficult to do year to year due to other budget constraints. This year the budgeted contingency is \$689,409, which meets the 5% goal for General Funds. Additionally, the budget includes a \$3,387,000 capital/equipment reserve, which includes a transfer of \$300,000 from the General Fund and a carryover from capital/equipment funds budgeted in prior years for special projects.

Personal services comprise 60.81% of the General Fund expenditures and include payroll and related benefits. The City has a current contract with the Teamsters General Union and the Brookings Police Association that will expire on June 30, 2025 and June 30, 2027 respectively. Effective July 1, 2025, the total PERS rates are between 29.95% and 36.35%, depending on what date the employee entered the PERS system and whether the employee is a public safety employee or not. The next PERS rate change will occur July 1, 2027. All employees contribute 12.5% toward their insurance premium.

Utility Funds

The utility funds include the Water Fund and the Wastewater Fund. The average residential bill is estimated at \$121.96/month including System Replacement Fees (SRF) of \$14.14 per month, based on 500 cubic feet of water usage. This amount includes a 2.7% (\$.85) increase to the water rates, a 2.7% (\$1.98) increase to the sewer rates, and an increase of 2.7% (\$0.37) to System Replacement Fees, effective July 1st. The effect of the increase equates to \$3.20 on the average utility bill. When the Fuel Tax measure passed in May 2015, the Streets SRF of \$2.98 was repealed, decreasing utility bills by \$2.98 per month, today that would be \$3.87. A measure on the November 2022 ballot to renew and increase the current fuel tax of four cents per gallon to five cents per gallon for 5 years, passed by 59%.

System Development Charges (SDC) & System Replacement Fees (SRF)

System Development Charges (SDCs) are one-time fees on new development that help fund infrastructure needed to support growth—such as water, sewer, streets, storm drains and parks. State law limits their use to capital improvements that increase system capacity. They cannot be used for maintenance or to replace existing facilities.

The City is currently conducting an SDC study to evaluate infrastructure needs and update the fee structure in accordance with state law and projected growth.

SRFs are the collection of reasonable charges to finance capital replacement, non-capacity increasing extension, and non-capacity increasing expansion of municipal utility facilities. These charges are adopted by Council with an annual resolution to adjust rates. SRF revenue has been a stable, consistent resource for capital projects and infrastructure improvements.

Other Significant Budgetary Items

The adopted budget includes a \$165,000 transfer from the 9-1-1 Fund to the General Fund to pay for a portion of dispatcher salaries.

The General Fund budget includes a contract with South Coast Community Aquatics (SCCA) for swimming pool management services. Council approved a contract with SCCA to manage the City's municipal pool for an extended six month season (May-October) in 2025.

This year's budget includes paving and/or reconstruction of the top priority streets identified for major maintenance using the evaluation criteria in the adopted Pavement Management System Plan. The City Council put a fuel tax ballot measure on the May 2015 ballot requesting four cents per gallon, approved and renewed in 2018. Voters passed an increase to five cents per gallon in November 2022. This will generate approximately \$350,000 annually for streets maintenance and construction.

In 2018, the City purchased the Brookings Airport from Curry County. In addition to operations, the budget for the Airport Fund includes \$226,200 for the construction and improvements as determined by the airport master plan, 99% funded by state and federal grants.

General capital projects in the 2025-26 budget include Bud Cross Day Use improvements, enhancements to the dog parks at Chetco Point and Stout Park along with improvements at Salmon Run Golf Course. This budget also includes the complete refurbishment of a pumper truck and a new Fire Captain Vehicle.

Council approved a contract with Jacobs Engineering (previously CH2M) for Water and Wastewater Treatment services, effective March 12, 2018. The 2025-26 budget reflects the continuation of this agreement.

The City was awarded funding in 2021 through Business Oregon's Safe Drinking Water Revolving Loan Fund to complete water distribution projects in 2022-23 including water line replacements on Alder Street, 7th Street, Dodge Avenue, Memory Lane, Eastwood Lane and Pacific View area, and the interior painting of the Marine Drive reservoir. All of these have been completed with the one remaining which is the replacement of Tidewater Reservoir. Funding includes a forgivable loan of \$280,000 and long term loan of \$3,895,000.

The City has been working with USDA-RD on a \$24,996,000 loan, to complete \$30.2 million of wastewater projects in the next three years. Of those projects, \$14.2 million are wastewater collections projects, \$1.8 million are wastewater pump station projects and \$14.2 million are wastewater treatment projects.

Conclusion

Fiscal year 2025-26 will continue to be challenging and busy at the City. Staff will strive to continue to provide the present level or improved level of services. Also, staff will continue to be prudent in City resources by reviewing financing options for important future projects to assure a healthy reserve for each fund.

Respectfully,
Anella Ehlers, Budget Officer
Finance Director

JUDICIAL 2025-26

The Brookings Municipal Court continues to serve a vital role in ensuring local accountability and supporting community standards. Since the City expanded the Court's jurisdiction in FY 2012-13 to include traffic citations issued by the Brookings Police Department (BPD), it has evolved into a consistent and effective venue for adjudicating both traffic violations and Brookings Municipal Code (BMC) infractions.

The Court is held monthly and typically sees around 30–40 defendants on its docket. However, recent trends show increased activity: in calendar year 2024, a total of 732 traffic citations were issued, with 502 cases appearing on the court docket. There were also 15 BMC or non-traffic violations—including nuisance complaints, Minor in Possession (MIP), parking infractions, and unauthorized camping. Of the docketed cases, 262 resulted in a Failure to Appear (FTA), requiring additional follow-up processing.

In the first quarter of 2025 alone, the Court has already processed 173 traffic citations and 11 non-traffic cases, with 109 cases scheduled and 58 FTAs. This sustained volume reflects the Court's growing administrative demands.

Staffing and Operations

The Court is presided over by a part-time Judge, supported by a Judge ProTempore as needed. The Judge receives a \$325 monthly retainer, while Pro Tem Judges are paid \$200 per session. Court Clerk responsibilities are carried out by the Dispatch Supervisor, who also manages the associated paperwork, correspondence, and coordination with DMV and collections agencies.

FTA processing is a growing part of the Court Clerk's workload. Each court session triggers a follow-up schedule: Week 1: FTA/Guilty by Default letters are mailed. Week 3: DMV suspensions issued for unpaid FTAs from the prior month. Week 4: Unresolved cases over 60 days old are sent to collections.

This structured timeline ensures accountability and supports compliance with state reporting and enforcement processes.

Professional Development

The Judicial budget includes funding for training opportunities for the Clerk and continuing legal education for the Judge. The City supports ongoing membership in the Oregon Municipal Judges Association, which provides professional resources and legislative updates that assist in maintaining a fair, consistent, and well-informed municipal court.

FINANCE AND ADMINISTRATION

2025-26

The 2025-26 Finance and Administration Department budget supports the activities of the City Council, City Manager, Deputy Recorder, Finance Director, Grant/Project Manager, Human Resources/Accounting Specialist, Payroll/Accounts Payable Specialist, Accounts Receivable Utility Clerk, and two part-time Visitor Center Clerks. This budget also includes payroll costs for a part-time IT employee. A transfer is made from the Technology Fund to the General Fund to cover this expense.

City Council and City Manager

The City Council is the policy and legislative body of the City, responsible for establishing long-range goals and policy, providing broad oversight of City management, and evaluating progress toward achieving goals. The City Council meets twice monthly in regular session, once monthly in workshop session, and at other times as needed. The budget supports the preparation of Council materials, public information, and recordkeeping.

The City Manager maintains internal systems, oversees department activities, and builds relationships with state and federal elected officials by participating in meetings and events and serving on advisory committees. These efforts are consistent with the City Council goal to “Improve Internal Systems.”

Finance and Administrative Support

The Finance Director manages the day-to-day activities related to finance and human resources. The Director is also responsible for budget preparation and monitoring, accounting functions (payroll, purchasing, accounts payable, billing), financial reporting, treasury management, human resources, records management, the annual audit, and Information Technology (IT).

The Deputy Recorder serves as the primary support person for the City Manager and City Council. This role also manages the City’s website, Public/Education/Government (PEG) television channel, and social media outreach.

The City is required to complete an annual audit, which is performed by an outside independent Certified Public Accountant (CPA) firm.

Grant and Project Management

The Grant/Project Manager is responsible for researching, applying for, and managing grants that support City priorities, including infrastructure improvements, public safety, tourism, and community development. This position also oversees the financial and contract administration of funded projects, ensuring compliance with grant requirements, accurate reporting, and timely project completion. The Grant/Project Manager collaborates with department heads, regional partners, and community organizations to identify funding opportunities that align with City goals.

Budget Summary

The 2025-26 budget includes funds for operations with no capital outlay or extraordinary items. Together, these roles support the efficient operation, transparency, and financial health of the City of Brookings.

BROOKINGS DEPARTMENT OF PUBLIC SAFETY

2025-2026

The Brookings Department of Public Safety is comprised of the Brookings Police Department and the Brookings Fire Department. The Chief of Police is the Director of the Department of Public Safety and is responsible for the administration of both organizations.

MISSION

The mission of the Brookings Department of Public Safety is to be the leader in making Brookings the finest community of its size in Oregon through effective community partnerships that focus on safety and quality of life for both our citizens and visitors. We accomplish our mission by providing the highest quality law enforcement, fire services, community information and support services possible within the resources provided to us. We have earned the reputation of being professional, responsive, systematic, and able to adapt rapidly to change in the community adding value in return for the precious tax dollars with which we are entrusted.

POLICE DIVISION

The Brookings Police Department is a full-service organization, with 24-hour, seven days a week coverage. This department is the only law enforcement agency in Curry County to provide that level of service. The Brookings Police Department is also the Southern Curry County 9-1-1 Public Safety Answering Point (PSAP) which dispatches for five fire departments, Cal-Or Ambulance, and State, County and local Law Enforcement. In addition to patrol officers, detectives and communication officers, we are working to establish a Police Reserve Program to augment full-time staff. Additionally, special units include: K-9, School Resource Officer (SRO), and Community Resource Officer (CRO).

FISCAL YEAR 2025-2026 PRIORITIES

The emphasis of the Fiscal Year 2025-2026 budget is to maintain efficient, effective and professional service to our community; in addition, continued attention in fostering good employee relationships, as well as organizational development and community problem solving, will continue.

1. Focus on officer and dispatcher retention by living by the philosophy "Mission First, Employees Always" so we retain our quality employees and minimize our need for recruitment by continuing to support staff through training, mentoring, coaching and positive leadership to assure the community is efficiently and effectively served and criminal actions are proactively dealt with.

2. Improve “quality of life” concerns associated with city ordinance violations, parking violations and any other neighborhood/community issues that may arise causing disruption.
3. Continue our close partnership with the Brookings-Harbor School District through the School Resource Officer who is both a deterrent to criminals entering our schools and criminal behavior on campus as well as a liaison and educator building relationships with students, parents, and staff. This year, we expand this partnership to include Curry County who is committing opioid settlement funds towards the cost of this impactful resource.
4. Continue our close partnership with Curry Health Network through our agreement for public safety services where officers provide focused patrol of the Curry Medical Center and property throughout each 24-hour period and during specifically requested times.
5. Continue our collaboration with community partners and stakeholders through the Community Resource Officer (CRO) program whose primary purpose is as a homeless liaison. Our CROs also manage our Property Watch Program for commercial businesses and work closely with all businesses to address their “quality of life” concerns and provide us better focus as to where negative issues persist.

These two officers proactively provide initial outreach to homeless individuals and families throughout Brookings seven days a week with the intent of bettering that person’s situation by reconnecting them with family, pairing them with available housing, mental health and addiction resources as needed. Along with this community outreach they are also our primary camping enforcement officers working to mitigate any negative effects on our park users and ensuring the parks are accessible to all. This assistance is now enhanced by having a pickup which allows them to transport homeless individuals with their property to available resources as well as remove abandoned items immediately from public parks.

6. Continue to aggressively address the distribution, manufacturing, and criminal possession of illegal narcotics, with a focus on fentanyl, within our City as well as alcohol-related incidents with our local youth and adults alike.
7. Manage the expenses of the organization by operating within the fiscal levels established in the final budget by adding value in return for the precious tax dollars with which we have been entrusted.
8. Saving toward the purchase of capital equipment related to the replacement of core components of the communications system. Reliable components are critical to maintaining communications with Police, Fire, Ambulance and Public Works.

FIRE DIVISION

The Brookings Fire Department includes a professional service organization with 24-hour, seven days a week coverage. The Brookings Fire Department is the only Curry County Fire Department with paid career staff directing the operations of the organization. The Brookings Fire Department also serves the Brookings Rural Fire Protection District as well as Upper Chetco Volunteer Rural Fire Protection District.

FISCAL YEAR 2025-2026 PRIORITIES

1. Focus on firefighter and Community Emergency Response Team (CERT) retention by living by the philosophy "Mission First, Employees Always" so we retain our quality employees and volunteers and minimize our need for recruitment through continued quality training, education, and by providing equipment that meets the current National Fire Protection Association (NFPA) and Oregon Occupational Safety and Health Administration (OR-OSHA) standards.
2. Utilization and continued development of the fire training area, to include adding a 2nd story to one of the Class A burn structures and the development of a roof training prop. This site allows for focused training events where firefighters are now able to "train as they fight" honing critical skills, building their experience, and ultimately their confidence to more effectively serve our community.
3. Continue to improve "Quality of Life" issues in the community by working with other City staff and our local Oregon State Fire Marshal (OSFM) Deputy in planning, fire code enforcement, and development review.
4. Remain committed to responding to our community needs, expectations, and desires by listening and valuing input to continually meet and exceed our mission. For the third year, we have been awarded the Wildfire Season Up-staffing Grant from OSFM. This will enable the department to have staff available during the peak wildfire season.
5. Continue community education efforts in providing fire and safety education to our citizens.
6. Continue working with our automatic and mutual aid partners county-wide. Our department along with seven other county fire departments submitted a county-wide Assistance for Firefighters Grant (AFG) application to aid in purchasing 16 new Self-Contained Breathing Apparatuses (SCBA) allowing for equipment compatibility at mutual aid scenes.
7. A pick-up will provide the extra room needed to carry all necessary equipment for Incident Command. Along with a command board and a second radio installed in the back, it will also have the needed room to carry rope rescue equipment,

medical equipment, and additional personnel. The current 2013 Durango is high mileage and does not have the capacity to do this.

8. The refurbishment of our 2003 E-One pumper truck has numerous benefits. Equipment-wise, all emergency lighting will be replaced with LEDs, the fire pump and all plumbing will be replaced, the brakes upgraded, steering, and suspension parts will be replaced, along with other improvements. Appearance-wise, the interior will be new and the truck will receive a new paint job. With everything that is being replaced and upgraded we can expect another 15-20 years of service life from this apparatus. The Type-3 fire engine we were awarded by OSFM last year will be used in place of the E-One during the approximately 5-month refurbishment.

PLANNING AND BUILDING DIVISION BUDGET 2025-26

The 2025-26 combined Planning and Building Division budget mirrors last year's budget. Staffing will consist of the Public Works and Development Services Director, Public Works and Development Services Deputy Director, Building Official, a half time building plan reviewer and inspector, and the Planning Technician whose planning focus is on downtown planning, facilities planning as well as provide staff support to the Planning Commission.

The City will continue with the intergovernmental agreement with Lane Council of Governments (LCOG) to perform consulting services for complex planning and zoning land use applications.

PARKS AND RECREATION BUDGET 2025-26

Brookings is home to a diverse and well-used parks system that includes three community parks—Azalea Park, Bud Cross Park, and Chetco Park—alongside three neighborhood parks: Easy Manor Park, Stout Park, and Mill Beach Access. The system also features three pocket parks, Oasis Park, Chetco Town Center and Bankus Fountain.

The FY 2025-26 Parks and Recreation budget supports the ongoing maintenance of these parks and public open spaces, including janitorial services and trash collection. It also includes planned capital improvements at Salmon Run Golf Course. Oversight of the parks division is provided in part by the Public Works and Development Services Deputy Director, who allocates 30 percent of their time to supervising three full-time employees, two seasonal staff, multiple contracted service providers, and supporting the Parks and Recreation Commission. The Public Works crew will continue to assist with larger projects such as parking lot grading, special event setup, and other infrastructure-related needs.

Azalea Park is the crown jewel of Brookings parks hosting Nature's Coastal Holiday Lights and Concerts in the Park, along with the Capella which has become a popular wedding venue. The recently completed Kidtown Playground offers fun, safe and engaging play.

Parks

Proposed operating expenses include: utilities, supplies and materials, training, and grant applications.

FY 24-25 Capital improvement projects were completed including: Retrofitting the Tennis Court and Basket Ball Court Lighting to LED as well as installing a section of fence at the Chetco Point Dog Park.

Planned Capital Improvement Projects

Day-use area at Bud Cross Park

Bud Cross Park is the only community park in Brookings that currently lacks a designated space for picnicking, gathering, and unstructured play. Planned improvements include installation of a play structure with rubberized surfacing, ADA-accessible asphalt pathways, a new paved parking lot with a vegetated filter strip for stormwater treatment, a concrete picnic area with tables, and the planting of 20 shade trees to enhance comfort and usability.

The project supports goals outlined in the City's 2020 Parks Master Plan, which identified Bud Cross Park as a priority for upgrades to improve accessibility and expand recreational offerings. In March 2025, the Brookings Parks & Recreation Commission unanimously recommended moving forward with this project, reaffirming its importance to the community. A citywide survey received 177 responses, with 94.3% of respondents supporting or strongly supporting the proposed improvements. Letters of support from the Brookings-Harbor Little League, local soccer groups, and the Chamber of Commerce further demonstrate broad community endorsement.

To support the cost of construction, the City has applied for grant funding through the Oregon Parks and Recreation Department (OPRD), which if awarded will provide significant financial support for the project. The required local match will be covered by accrued Parks System Development Charges, ensuring no impact to the General Fund.

This investment directly reflects community priorities and fulfills a long-standing need for accessible, family-friendly, and inclusive public spaces—ensuring Bud Cross Park can better serve residents and visitors for years to come.

Dog Park Enhancements

Dog parks play an important role in promoting community wellness by offering a safe, off-leash environment where dogs can exercise and socialize. These spaces benefit not just pets, but their owners as well—encouraging outdoor activity, reducing stress, and providing opportunities for neighbors to connect. At Chetco Point Dog Park, enhancements are planned to create engaging play zones tailored to both large and small dogs. The large dog area will feature new agility and activity equipment, such as climbing structures, jump obstacles, and a decorative fire hydrant. For small dogs, additions will include low-profile interactive elements like a crawl tunnel, grooming table, and weaving posts designed for safe and stimulating play. These improvements will also be installed at Stout Park Dog Park, ensuring both parks offer fun, accessible, and enriching experiences for dogs of all sizes and their owners.

Salmon Run Golf Course

Located 3.5 miles from downtown Brookings, Salmon Run Golf Course is a City-owned public course that offers a high-quality golfing experience in a stunning natural setting. With four sets of tees ranging from 4,129 to over 6,000 yards, the course accommodates players of all skill levels. Originally opened in 1999, the course is managed under a long-term agreement with CourseCo, Inc., which runs through 2030. Although CourseCo brings professional expertise in course operations, the facility has not been profitable in recent years, and the City continues to subsidize its operations to preserve this valued community amenity.

Salmon Run is more than just a golf course—it is a full-service recreational destination. The facility features a restaurant, full-service bar, pro shop, and PGA teaching staff. Membership options are available for individuals, couples, and families, with tiered plans including Players, Associate, and Executive levels. The course also hosts tournaments and serves as a scenic venue for weddings and special events.

Affordable public access is a priority, with flexible pricing that includes seasonal rates and special offers for seniors, juniors, and local residents. For example, standard 18-hole summer rates range from \$55 (walking) to \$73 (with cart), with reduced rates in winter months. Member guests, youth under 19, and Curry and Del Norte County residents benefit from additional discounts. Twilight and walking specials offer even more access for casual or budget-conscious players. Club and cart rentals, as well as range balls, are also available at reasonable rates.

Capital improvement projects completed during FY 2024-25 included cart path resurfacing, bridge repairs, and streambank erosion mitigation to protect infrastructure. For FY 2025-26, planned improvements include continued irrigation system repairs, regrading of tee boxes, additional cart path and bridge work, and the further development of a driving range to enhance the player experience and expand programming potential.

SWIMMING POOL BUDGET 2025-26

The FY 2025-26 Swimming Pool budget supports the City's ongoing partnership with South Coast Community Aquatics (SCCA), which assumed management of the municipal pool in April 2024. This transition has been well-received by the community and has proven effective in improving operations, programming, and financial sustainability. SCCA has successfully secured grant funding to help offset operational costs and has shown strong commitment to expanding recreational access for all ages.

In FY 2024-25, the City completed a resurfacing project to improve the safety and longevity of the facility. Additionally, SCCA operated the pool during the winter months for the first time, as part of a regional partnership with the Fred Endert Municipal Pool and the City of Crescent City during their facility's maintenance closure. This pilot demonstrated strong demand and operational feasibility for an extended pool season in Brookings.

As a result of a proposal from SCCA, the FY 2025-26 budget includes a significant increase to support an extended operating season from May 1 through October 31 compared to the traditional June through August schedule. This request was made to respond to strong public interest in more consistent access to swimming lessons, recreation, fitness, and water safety programming.

The City values its partnership with SCCA and remains committed to investing in the pool as a vital community asset that promotes health, safety, and year-round recreation.

STREET/STORMWATER BUDGET 2025-26

The City of Brookings streets network includes approximately 32 miles of paved roadway and 19 miles of underground pipe storm drain systems. The Streets budget includes equipment, materials and staffing needed to maintain City streets and storm drains.

This year's capital budget includes paving and/or reconstruction of the top priority streets identified for major maintenance using the evaluation criteria in the newly adopted Pavement Management System Plan created by the Dyer Partnership in 2023.

Funding for resources to respond to extreme weather events such as flooding, fallen trees and failing roadways is also included in the street/stormwater budget.

The stormwater master plan was completed in June 2016. The dedicated funding sources for the stormwater system is the Stormwater System Replacement Fee and Stormwater System Development charge.

A project to construct sidewalks along the east side of Chetco Avenue from Lucky Lane to Parkview Drive has been approved for an ODOT administered grant and was awarded to a local contractor Tidewater Contractors. The total project is estimated at \$5,976,432 with a \$622,400 local match. The project is scheduled to be complete in late 2025.

The City received an ODOT Safe Routes To School Grant in 2021 for pedestrian improvements along Chetco Avenue at Pacific and 5th Street that we anticipate will extend into this fiscal year.

WATER DISTRIBUTION BUDGET 2025-26

The City of Brookings' water distribution system delivers treated, potable water through approximately 56 miles of piping, supported by nine pump stations and 11 reservoirs with a combined capacity of 4.0 million gallons. This infrastructure serves 3,342 connections across the community.

In FY 2024–25, the City completed water line replacements in the Hillside Valley and Ransom Street areas. These upgrades enhance system reliability and reduce maintenance needs.

In 2021, the City secured funding through Business Oregon's Safe Drinking Water Revolving Loan Fund to support critical infrastructure improvements. This funding enabled water line replacement projects on Alder Street, 7th Street, Dodge Avenue, Memory Lane, Eastwood Lane, and in the Pacific View area.

The last major project included under this funding is the replacement of the Tidewater Reservoir and its associated structures. This project experienced delays due to property partitioning, evolving seismic safety standards, and the need for additional engineering design work. As a result, cost estimates now exceed the original revolving fund allocation. Business Oregon has advised the City to complete project design and proceed with bidding to determine actual costs, which will inform a decision on potential supplemental funding. The current cost estimate for the Tidewater Reservoir project stands at \$1.97 million.

The City continues to prioritize water system safety through implementation of the backflow prevention program. All City-owned facilities requiring backflow protection are currently in compliance, and the majority of private systems have been inspected. Annual testing and documentation are now part of routine operations to ensure continued protection of the City's water supply.

The City has submitted state and federal appropriation requests for the high-priority Easy Street water line replacement project estimated at \$1.5m and will continue to seek funding opportunities to support this critical infrastructure upgrade. The existing infrastructure—comprising aging asbestos cement (AC) and cast iron (CI) water mains dating from the 1950s—experiences frequent breaks, low water pressure, and inadequate fire flow. The proposed project will replace 2,950 linear feet of undersized pipe with modern, larger-diameter lines, creating a fully looped system to improve fire safety, system redundancy, and reliability for approximately 1,200 residents.

Completion of the Easy Street project will also allow for essential roadway improvements, including paving, infill sidewalks, ADA-compliant ramps, and pedestrian crosswalk enhancements—supporting both infrastructure resiliency and community livability.

WATER TREATMENT BUDGET 2025-26

The City of Brookings sources its drinking water from a well intake assembly located approximately four miles upstream beneath the Chetco River. This groundwater source, designated by the Oregon Health Authority (OHA), benefits from natural pre-filtration as water moves through multiple sand layers before entering the intake system.

Disinfection is the primary water treatment method, involving the addition of chlorine to eliminate harmful bacteria and microorganisms. While disinfection is the primary method, the City's water treatment plant (WTP) is equipped to implement filtration and sedimentation processes when needed to meet drinking water standards.

Since March 2018, the City has contracted with Jacobs to operate both water and wastewater treatment facilities. This partnership restructured the City's budget by consolidating formerly separate costs—such as personnel, repair, and maintenance—into a single contract service fee. For FY 2025–26, the contract includes a 10.94% increase.

This year's increase reflects a combination of rising operational costs and expanded regulatory requirements. The cost of electricity continues to climb, chemical prices—particularly for chlorine—have risen sharply, and new Oregon Department of Environmental Quality (DEQ) regulations now mandate quarterly specialized sampling, adding to the complexity and expense of compliance. Despite these rising costs, the City's allocated budget for water system repairs remains unchanged from the previous fiscal year, reflecting a commitment to long-term asset maintenance while managing cost pressures strategically.

In 2024, the City treated approximately 486.40 million gallons (MG) of water, an increase from 422.63 MG in 2023. The average daily water demand rose to 1.329 MG (up from 1.160 MG in 2023), while uncommon, we did experience a new maximum daily demand of 2.425 MG, compared to 1.448 MG in 2023. The WTP operates continuously, 24/7, to meet OHA potable water standards.

Jacobs is currently obtaining quotes to replace aging vertical turbine pumps at the WTP and at the 1.5 MG reservoir that supplies the Old County reservoir. In addition, Jacobs is in the process of obtaining quotes to upgrade the Mission Communications systems at both the Ranney intake and the water treatment plant. These systems are essential for real-time monitoring and operational control of the City's water infrastructure. The current equipment is significantly outdated, and upgrading it is a necessary step to ensure continued reliability, efficiency, and the ability to respond quickly to any system issues.

The City is preparing to transition from chlorine gas to hypochlorite at both the intake and the treatment plant. This planned improvement will enhance operational safety, reduce chemical handling risks, and lower long-term costs.

To strengthen protection of our community's drinking water, the City has submitted a grant application to the Oregon Health Authority (OHA) for Source Water Protection funding. If awarded, this grant will fund the installation of security fencing, enhanced signage, and support for community-driven river cleanup efforts.

WASTEWATER COLLECTIONS BUDGET 2025-26

The City of Brookings' wastewater collection system comprises approximately 175,000 lineal feet of gravity sewer mains, 19,000 lineal feet of pressure sewer lines, 850 manholes, and thirteen pump stations. Planned improvements include pipe replacement, pipe lining and new interceptor lines.

The City will continue its efforts to address inflow and infiltration (I/I) as required by the Oregon Department of Environmental Quality (DEQ) under the City's I/I program permit. I/I issues—caused by surface and groundwater entering the sewer system through structural defects or improper connections. This has been a longstanding concern for both the City of Brookings and the adjacent Harbor area. Previous I/I studies conducted in 1979 and 1997 recommended system improvements, many of which the City has implemented through ongoing repairs, rehabilitation, and line replacements. Since 1996, most of the City's sewer mains have been cleaned and televised to assess condition and prioritize improvements.

Continued I/I abatement is critical to preserving the capacity of the wastewater treatment facility and accommodating anticipated growth, especially in developing Lone Ranch area and other northwestern sections of the City.

Capital improvements to the collection system are funded through base sewer fees, separate from the City's Wastewater System Replacement Fund (SRF) and System Development Charge (SDC) programs. The SRF and SDC programs support major repair, replacement, and, in the case of SDCs, capacity-increasing infrastructure improvements. The Wastewater Facilities Plan guides us in implementing targeted sewer rehabilitation strategies in future Capital Improvement Program (CIP) budgets.

City utility staff respond 24/7 to sanitary sewer overflows, which typically result from severe weather events, pipe failures, or blockages in the collection system.

The City is working with USDA Rural Development to finance approximately \$30.3 million in wastewater infrastructure projects over the next three years. Of this total, \$14.1 million is allocated to wastewater collections improvements, and \$1.8 million to pump station upgrades. A supplemental Environmental Review was required due to project design changes and is expected to be completed in early FY25.

These projects will improve the reliability and performance of the existing wastewater collection system while supporting both current and future development within City limits in compliance with DEQ regulations.

Recent accomplishments include the successful repair of the Deer Park pump station.

WASTEWATER TREATMENT BUDGET 2025-26

The City of Brookings owns and operates a Grade 3 wastewater treatment plant along with 13 sewer lift stations, providing essential services to residents and businesses within city limits. Additionally, the City treats wastewater for the Harbor Sanitary District (HSD) through a recently renewed intergovernmental agreement.

In 2024, the treatment plant processed 547.062 million gallons of wastewater—an increase from 426.070 million gallons in 2023. Of this total, 431.061 million gallons originated from Brookings and 116.001 million gallons from HSD. While the facility is designed to handle up to 15.5 million gallons per day, average summer flows remain below 1 million gallons per day. The continued decline in wet-weather flows reflects successful efforts to reduce inflow and infiltration (I/I) within the City's collection system.

Operations and maintenance of the City's water and wastewater systems are carried out through a partnership with Jacobs Engineering Group, a global leader in infrastructure and environmental services. This collaboration provides the City with access to highly specialized personnel, regulatory compliance support, and state-of-the-art asset management tools—resources that would be difficult and costly to develop in-house. By leveraging Jacobs' expertise, the City ensures efficient, high-quality service delivery while avoiding the logistical and financial challenges of managing these complex systems internally.

The FY 2025-26 contract with Jacobs includes a 10.94% cost increase, reflecting higher operational costs. Rising electricity rates and chemical prices continue to drive up expenses, along with broader increases in the cost of doing business that are affecting municipal utilities.

A critical backup generator for the wastewater treatment plant, ordered in FY 2024-25, is scheduled for delivery and installation in FY 2025-26. Once operational, this generator will provide essential emergency power to maintain core treatment functions during electrical outages.

The City has secured a \$30.3 million loan and grant package through USDA Rural Development to support comprehensive wastewater system upgrades over the next three years. Of this, approximately \$14.2 million will fund improvements at the treatment plant. Planned projects include:

- Construction of a new UV disinfection system and replacement of the plant water system
- Upgrades to the headworks, primary sedimentation tanks, trickling filter, solids contact basins, secondary clarifier pump station, and digester
- Application of protective coatings and corrosion control measures throughout the plant

The construction bid package is expected to be released in early FY 2025-26. These investments will significantly improve system performance, extend the useful life of critical infrastructure, and ensure continued compliance with environmental regulations.

9-1-1 FUND BUDGET 2025-2026

The 9-1-1 fund is a special revenue fund used to account for proceeds of specified revenue sources that are legally restricted to expenditures for special purposes. The primary revenue source in the past has been all of the City's apportionment of the State of Oregon's telephone tax revenues. Curry County forwards approximately 51% of their telephone tax revenues to the City for providing the 9-1-1 and dispatch services in the unincorporated areas in the southern portion of the County. Primarily, expenditures from this fund are for the operations of the 9-1-1 center, maintenance, and replacement of 9-1-1 and paging equipment.

A priority is saving toward the purchase of capital equipment related to the replacement of core components of the communications system. Reliable components are critical to maintaining communications with Police, Fire, Ambulance and Public Works.

AIRPORT BUDGET 2025-26

The City of Brookings acquired the Brookings Municipal Airport from Curry County in 2018 to preserve and enhance local aviation services that are vital to the region's economy, connectivity, and emergency response capacity. The airport serves general aviation, including business travel, recreational flying, emergency medical transport, and wildfire response operations—making it a critical asset for residents, visitors, and neighboring communities.

The Airport Budget includes funding for operations and continued implementation of the 20-Year Airport Master Plan, adopted in 2022, which outlines phased improvements to maintain FAA compliance, improve safety, and expand aviation services. The plan is primarily financed through grants from the Federal Aviation Administration (FAA) and the Oregon Department of Aviation (ODAV). The airport generates minimal revenues through hangar leases and user fees, which help offset a small portion of operational costs.

In FY 2023-24, the City completed slurry sealing of the taxiways and aprons. In FY 2024-25, the City has two pending FAA grants—currently programmed and under final review that will pay for 95% of the engineering design of a full runway lighting and navigation equipment replacement. This design phase is budgeted at \$233,233, and the City has secured a COAR (Critical Oregon Airport Relief) grant from ODAV, reducing the local match to only 1%.

To prepare for the next phase, the City has also been awarded a conditional \$44,898 COAR grant from ODAV for the \$997,300 runway lighting construction project. This project is contingent on future FAA grant approval and, like the design phase, is expected to require only a 1% local match, thanks to state and federal funding partnerships. These improvements will increase the airport's safety and nighttime reliability while supporting year-round aviation services.

While many of the improvements outlined in the Master Plan are on track, the FAA has recently notified the City that funding will not be available for the Westside Cargo Aircraft Parking Lot projects, originally scheduled for FY 2028–2029. Staff will continue to seek alternative funding sources and revisit the timeline for this project as needed.

The City remains committed to carrying out the priorities in the Airport Master Plan, which guides investment over a 20-year horizon to ensure the Brookings Municipal Airport remains a safe, efficient, and vital transportation hub for Oregon's South Coast.

CAPITAL PROJECTS RESERVE FUND

2025-26

The Capital Projects Reserve Fund is primarily supported by transfers from other City funds and serves as a general reserve for large capital purchases. Transfers may occur annually when General Fund revenues exceed expectations and/or expenditures come in under budget. These reserves can then be used in future years for capital purchases, including required matches for grant-funded projects.

For FY 2025–26, the fund includes transfers from increased revenues generated through the Curry Transfer and Recycling franchise agreement and an updated estimate from the new Coos-Curry Electric franchise agreement.

Planned uses of the fund in FY 2025–26 include:

- Refurbishment of the 2003 E-One pumper truck
- Fire Captain vehicle
- Public Safety equipment replacement
- Continued savings for the future purchase of a dump truck for Public Works
- Significant Capella maintenance
- Savings toward resurfacing the swimming pool deck
- Painting the swimming pool building exterior
- Parks utility trailer
- Bud Cross Park improvements
- Public Works building maintenance

Budget Message Brookings Urban Renewal Agency

Fiscal Year 2025-26

To: Citizens of the City of Brookings
Honorable Chair Isaac Hodges
Directors of the Urban Renewal Agency
Members of the Budget Committee

Date: June 9, 2025

On behalf of the staff of the City of Brookings, I am pleased to present the adopted Brookings Urban Renewal Agency budget for fiscal year 2025-26. As required by law, the budget is balanced and totals \$3,034,200.

The primary purpose of the Brookings Urban Renewal Agency is to revitalize the commercial area of the City and to attract new businesses and jobs to the commercially zoned areas of Brookings. The Brookings Urban Renewal Agency is governed by a five member Board made up of the City of Brookings Mayor and Council members. The Urban Renewal Agency Budget Committee consists of the same members as the City of Brookings' Budget Committee.

The fiscal year 2025-26 budget includes resources from the carryover fund balance, and property tax increment revenues.

Expenditures include materials and services and capital outlay and debt service. The Agency paid off their primary debt in June 2020. The Agency has authorized expenditures to reactivate the Façade Program and complete sidewalk infill projects. The agency also held a workshop to prioritize additional projects that will go to the agency for approval this year.

Respectfully,
Anella Ehlers, Budget Officer
Finance Director
